

## Noise Suppressors

### AAC Evolution

**\$695**

The Evolution is available in models for 9mm, .40S&W and .45acp pistols. A recoil assisted design delivers flawless semi-automatic operation with traditionally recalcitrant Browning inspired designs from Glock, Heckler & Koch, Sig Sauer, and Walther. Requires a threaded barrel. Dimensions 33x190mm, weight 280g. Noise reduction 28-34db (dry), 40db (wet)

### AAC M4-2000

**\$795**

The M4-2000 attaches to a replacement flash suppressor, and can be installed or removed in less than 3 seconds. The light-weight and low profile design of the M4-2000 adds only 5.0" in length to the host firearm and does not interfere with the overall weapon balance or the mounting of accessory hardware. Replacement flash suppressors are available for the AR-15/M-16 series of assault rifles, Ruger AC-556, HK-33, G-36, G36-K, G36-C, and Steyr AUG. Dimensions 38x178mm, weight 650g, noise reduction 34db.

### Gem-Tech HALO

**\$675**

The HALO was designed to attach to any 5.6mm rifle using a 22mm NATO spec flash hider without tools in less than 30 seconds. This suppressor and mount were designed specifically for military weapons and may not fit on non-standard aftermarket flash hidere or muzzle brakes often found in the United States. Dimensions 38x197mm, weight 700g, noise reduction 33db.

### Gem-Tech TPRS

**\$865**

Designed for use with any .30 caliber rifle, including the .300 Winchester Magnum, the TPRS delivers exception performance on both bolt action and semi-automatic rifles. The patented Bi-Lock quick detach mounting system (fitting to weapon included in price) permits consistent mounting with repeatable accuracy. Dimensions 38x235mm, weight 795g, noise reduction 35db.

### Brugger & Thumet SMG

**\$900**

The B&T SMG Silencers are made to the specification of the weapon it is intended to be used on. The adapters are available for most commonly used Submachineguns such as listed below. The SMG Silencer does not affect the accuracy or the function of the weapon but delivers a high performance in reducing the sound level of the weapon. Using Subsonic ammunition will provide the best performance of sound suppression. Dimensions 35x200mm, weight 480g, noise reduction 33db.
