Leupold MK4 M1 10x

\$1,300

Leupold's goal of a scope that would be ideally suited to the special needs of the military and high intensity law enforcement organizations was achieved in the creation of the Mark 4 series. The Mark 4 10x40mm LR/T M1 is not only astoundingly durable, it is optically outstanding as well. The M1's oversized adjustment knobs give the user audible and tactile confirmation of each 1/4-MOA click.

Leupold 3-9x MR/T M1

\$820

Created specifically for the military's new Special Purpose Rifle, an M-16-style sniper system, this scope delivers excellent capabilities for everything from 50 to 700 meters. Eye relief is optimized for AR-style systems and this scope is ideally sized for these relatively compact rifles.

Nightforce NXS 5.5-22x

\$1,400

This is a tremendous tactical solution for military and special law enforcement applications. Broad and powerful magnification cined with the large field of view, four inches of eye relief and 100 M.O.A. elevation travel make the 5.5-22x56 NXS the most advanced field tactical scope ever produced. We established new standards for performance when we debuted this scope, and it remains the benchmark by which all other scopes are measured. Originally engineered for military .50 BMG, .338 Lapua and other long range applications, the 5.5-22x56 NXS is the first

Schmidt & Bender 3-12x50 PM II

\$2,199

Schmidt & Bender combines long established optical quality in a package intended for Police Marksman and anyone else demandind precision optics in a rugged package. Optics are clear and sharp, with a large field of view for the magnification. Add \$100 for the 4-16x model, and add 500 for reticle matched to .50-caliber ballistics.

US Optics SN-6 10x

\$1,400

US Optics builds custom scopes of the very highest quality. The SN-6 combines extreme accuracy, exceptional brightness and rugged features. Finishes, objective lenses, reticles, magnification and maximum MOA adjustment can all be changed at user request.
